MiniBook	7.875" (2363)	6.0" (1800)	300	0.125"	0.125"	0.25"	15.25" (4575)	6.0" (1800)

- When designing/formatting your pages, please keep them flexible at the edges to give us room for trimming.
- For left-side pages, the FACE is the left edge and the SPINE is the right edge. For right-side pages, the FACE is the right edge and the SPINE is the left edge.
- For books where the face and binding dimension is the same (square books and XL keepsake), you do not need to be concerned whether your page is a left-side or a right-side page.
- When designing a double-page (panorama) spread, you do not need to take into account that 0.25" from each page will disappear into the spine. If you design your spreads using our specifications or Photoshop templates our software takes care of this for you.
- You don't have to crop your double-page spread image into 2 individual pages. Our software automatically recognizes double-page spreads and crops them for you. A huge timesaver!

MiniBook 8x6	300	18.125"x7.75"	5437x2325	0.875"	0.375"	8.0"	6"

A tip for successful design - Keep critical design elements as far away from folds, trim and turn-in as possible - since our books are handmade and allow a lot of flexibility there can be variations in the size of books. Staying at least .25 inches or more from the trim will insure that any important elements end up where you intend.
